EDUCATION

"Babeş-Bolyai" University Cluj-Napoca, Romania

Pursuing Bachelor in Computer Science.

October 2019 - present

Expected graduation: July 2022

"Horea, Cloşca şi Crişan" National College, Alba Iulia, Romania

High school education specializing in Computer Science.

September 2015 - June 2019

PERSONAL PROJECTS

UBBRB

November 2020

Social platform project in the form of 3D multiplayer game with VR support, specialized possibilities for online teaching, school or corporation. Implements on app online browser, online chat and interactive white board into an immersive application. Won first prize in a 24 hours hackathon.

Social Network

October 2020

Social application with features like Facebook has: register, login, chat with friends, add friends, delete friends, send, accept and reject friendship requests; Everything is stored in a database making it accessible for multiple users in the same time.

OLX SearchBot

December 2019

Implemented an application that notify you when an item you are interested in was listed on OLX. Got the idea after searching a lot of time for laptops. It automates the process of constantly searching for the better deal and refreshing the page even if nothing new appears so it saves a lot of time. Can search by category, name and price range.

Children rights

June 2019

Created an educational interactive software for children to help them understand better their rights. It contains visible and hidden objects that help the user learn more and complete the levels.

Pizza Iulia

March 2019

Design a pizza restaurant webpage for placing orders online. It sends the invoice via mail to confirm the order and stores the data in database.

SKILLS

Technical C/C++, Python, Java, C#, Javascript, Prolog, Lisp
SQLServer, PostgreSQL, MySQL
Algorithmic and Data structures background

Linguistic Romanian: native
English: fluent
