"Babeş-Bolyai" University Cluj-Napoca, Romania	October 2019 - present
Pursuing Bachelor in Computer Science.	Expected graduation: July 2022
"Horea, Cloşca şi Crişan" National College, Alba Iulia, Romania	September 2015 - June 2019
High school education specializing in Computer Science.	

PERSONAL PROJECTS

OnlineCoursesUBB   April 2020

As this period came with the teaching and learning online, I observed every teacher has its site but there wasn't a place with all the sites linked together for the students. It's a packed front-end project with animations, full responsive, great looking on pc, tablets and phones which includes links to all the teachers organized on semesters.

Messenger   February 2020

Made a project together with a friend for communicating between multiple devices in the same network. It has graphic user interface that make it easy to use and give the user the ability to send texts and upload files giving access to them to all the users.

OLX SearchBot   December 2019

Implemented an application that notify you when something you searched for is listed again. It automates the process of constantly searching for the better deal and refreshing the page even if nothing new appears so it saves a lot of time.

Children rights   June 2019

Created an educational software for children to help them understand better their rights. It contains visible and hidden objects that help the user learn more and complete the levels.

Pizza Iulia   March 2019

Design a pizza restaurant webpage for placing orders online. It sends the invoice via mail and stores data in database.

SKILLS

Technical	C/C++, Python, Java script, algorithmic and data structures background
Linguistic	Romanian: native English: advanced
